IP CAMERAS

Resideo has provided the flexibility to allow a variety of cameras to be compatible. If you are using a camera that is not on this list below, confirm the camera is working properly. To verify, access the camera through a browser or the camera's software (consult the user's manual of the camera for the proper procedure). If successful, verify the RTSP port and path are correct. If the camera is not viewable through the TUXEDO after verifying these settings, then it is not compatible.
